### Statement on travel and transport in relation to Ebola virus disease (EVD) outbreak

**MVDr. Ludmila Krejčová**

#### Abstract

The current Ebola virus disease (EVD) outbreak is believed to have begun in Guinea in December 2013. This outbreak now involves community transmission in Guinea, Liberia and Sierra Leone and recently an ill traveller from Liberia infected a small number of people in Nigeria with whom he had direct contact. On 8 August 2014, WHO declared the Ebola virus disease outbreak in West Africa a Public Health Emergency of International Concern (PHEIC) in accordance with the International Health Regulations (2005). In order to support the global efforts to contain the spread of the disease and provide a coordinated international response for the travel and tourism sector, the heads of WHO, the International Civil Aviation Organization (ICAO), the World Tourism Organization (UNWTO), Airports Council International (ACI), International Air Transport Association (IATA) and the World Travel and Tourism Council (WTTC) decided to activate a Travel and Transport Task Force which will monitor the situation and provide timely information to the travel and tourism sector as well as to travellers.
